

## Community Platform

WEB3 GAMING  
DAO

### Open Board Community Platform

#### Purpose:

A community-based **web3** platform where imagination comes to life and the community grows stronger. Provides RPG Board Game players with added value in their gaming experience.

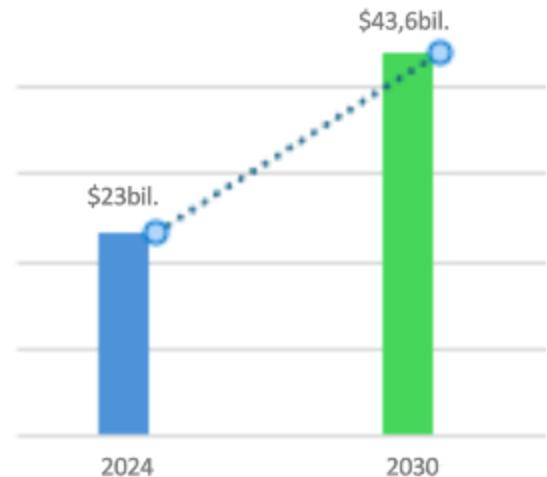

#### Open Board 2024 Market Share:

The RPG market size is valued at approximately **USD 23 billion** in 2023.

It is expected to continue growing, driven by increasing interest in tabletop and digital RPGs.

#### Forecast for 2030:

By 2030, the RPG market is projected to reach around **USD 43.6 billion**, with a compound annual growth rate (CAGR) of about **10% from 2024 to 2030**.

#### Factors Driving Growth:

**Increased Popularity:** The resurgence of interest in tabletop RPGs and the expansion of digital RPG platforms.

**Innovation:** Continuous innovation in game design and storytelling, attracting a broader audience.

**Community Engagement:** Strong community support and engagement, fostering a loyal player base.

**These trends indicate a robust and growing market for RPGs, with significant opportunities for developers and publishers.**

## Main Features:

### 1. Advanced Assistant:

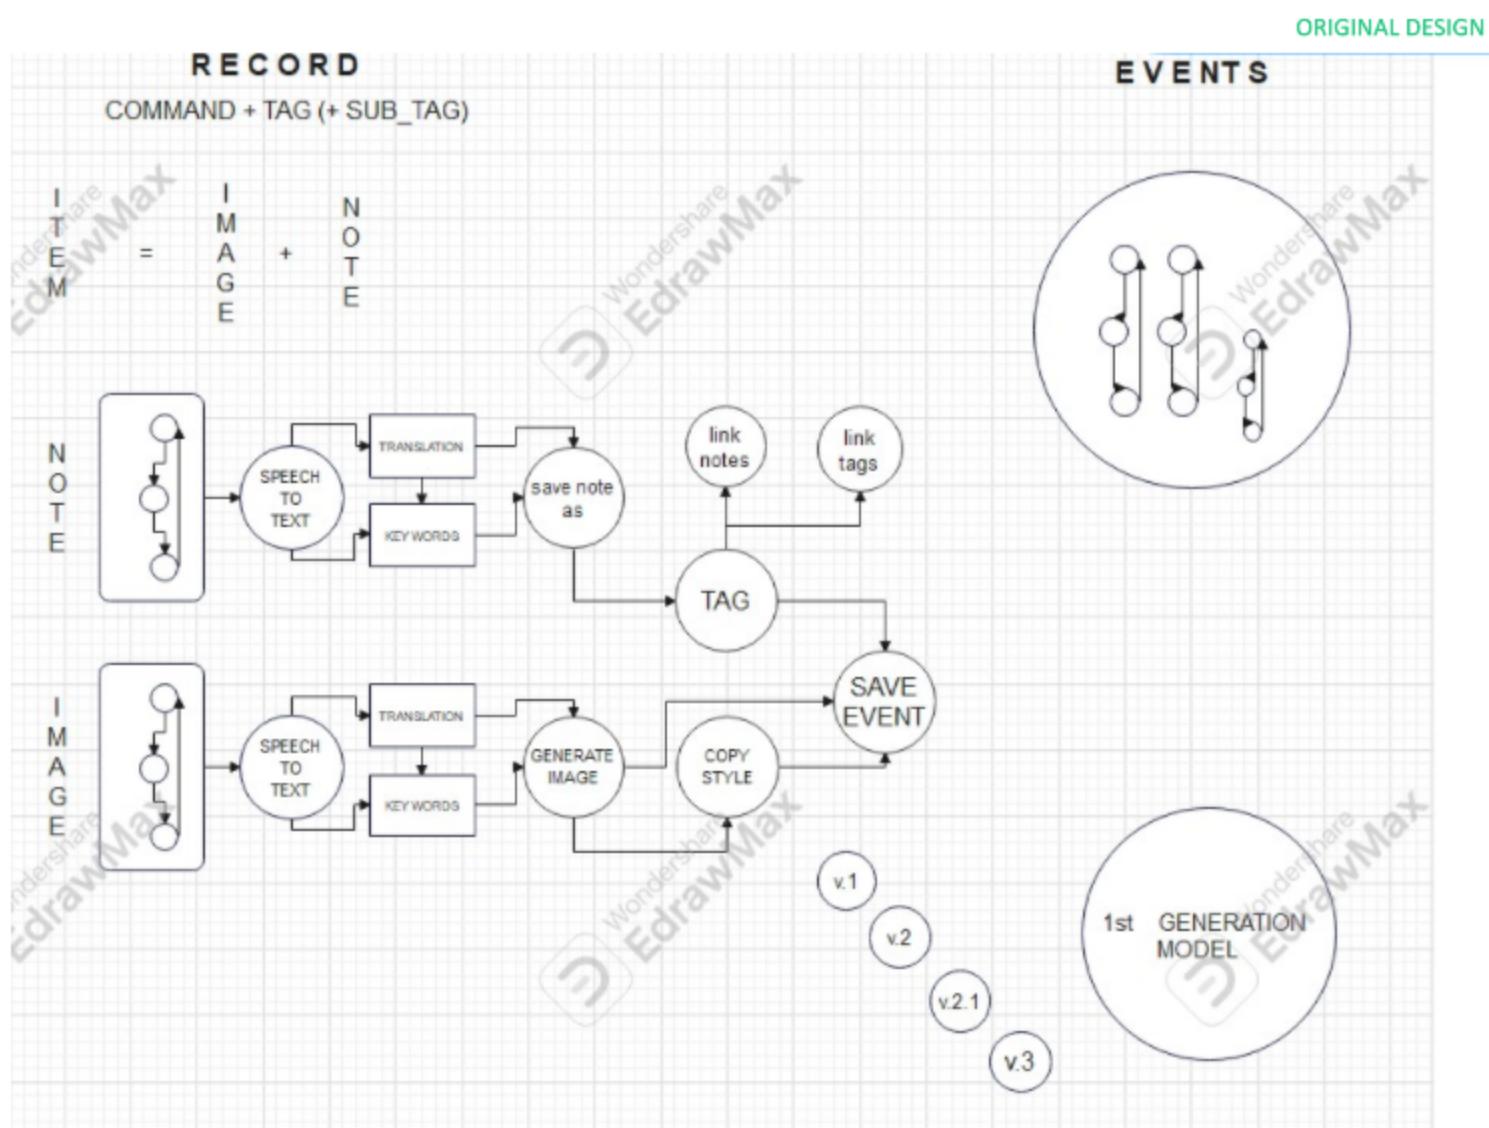

Built on the newest Open.AI technology.

Creates visualizations of the story told during the playthrough.

Allows players to add notes in triggered events as reminders or useful guides for other players.

Enables players to subtrigger events to drop specific items from the game.

Players can store, share, loan, or sell items.

### GOAL:

This Type of platform may well prove how to build a **sustainable economy and secondary market with high volume** for games on web3.

As an opposite to PLAY-TO-OWN and PLAY-TO-EARN types of economies the Open Board platform strives to **focus on collaborative content creation** strengthening the Community itself as a whole.
